Education

Bachelor of Engineering in Computer Science & Engineering ACS College of Engineering, Bangalore CGPA: 8.5	July 2027
Pre-University Course [PCMC] St. Joseph's Indian Composite PU College - 89%	Apr 2023
School [ICSE] Shantiniketan Educational Institutions - 90.8%	Mar 2021

Technical Skills

Programming Languages: JavaScript, Python, C++, Java, C
Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, TypeScript, RESTful APIs, API Development, Authentication (JWT), Client-Server Architecture
Databases: MongoDB, MySQL, Database Design, CRUD Operations
DevOps & Cloud: Docker, Docker Compose, AWS (EC2, S3, IAM), Jenkins
CS Core: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks
Tools: Git, GitHub, Docker, Nginx, Postman, Linux, Bootstrap

Experience

Machine Learning Intern – Alfido Tech (Remote)	Dec 2025 – Jan 2026
- Completed a 1-month remote internship focused on hands-on machine learning and real-world projects. - Implemented regression, classification, and clustering techniques with feature engineering and model selection, building and evaluating models using Python, TensorFlow, and PyTorch from preprocessing to basic deployment.	

Projects

AICademy – AI-Powered Tech Learning Platform	Feb 2026
- Developed and deployed a full-stack web platform offering structured tech learning roadmaps with curated resources, progress tracking, and project-based milestones. - Implemented AI-assisted recommendations, secure authentication, and RESTful APIs with scalable database design for reliable and responsive performance. Tech Stack: Tech Stack: Next.js / React.js, Node.js, Express.js, MongoDB, REST APIs, Docker, Nginx	
Codexp – Code Explanation Tool	Jan 2026
- Built and deployed an AI-powered web application that generates clear, human-readable explanations for code snippets, enabling faster comprehension of logic, syntax, and structure. - Integrated OpenAI API for real-time code interpretation with a responsive and type-safe frontend architecture for seamless user experience. Tech Stack: Tech Stack: Next.js, React, TypeScript, Tailwind CSS, OpenAI API, Vercel	
Android Malware Detector	Nov 2025
- Built an Android malware detection system using Random Forest and XGBoost, achieving 92%+ classification accuracy through static analysis of APK permissions and features. - Developed an end-to-end detection pipeline with APK scanning, SHA-256 hashing, risk scoring, confidence-based predictions, and performance evaluation using Accuracy, Precision, Recall, and F1-Score metrics. Tech Stack: Python, Machine Learning, Random Forest, XGBoost, Cybersecurity, React.js	

Certifications

Oracle Cloud Infrastructure 2025 – Certified Generative AI Professional	Sep 2025
NPTEL – Introduction to Machine Learning	Oct 2025
Cyber Security Job Simulation – Deloitte	Aug 2025
Django Masterclass: Get Started With Django Web Development – Udemy	Nov 2024

Achievements

- CODE NEURAL State-Level Hackathon – **Top 20 Finalist**
- Completed and delivered **5+ projects** to different clients in UK and UAE market accomplishing their need to custom web solutions for their ecommerce and startup businesses
- Machine Learning Internship – **Awarded A+ (92.97%) Performance**
- Fixed **10+** production bugs during an internship
