Professional Summary

Computer Science undergraduate with software development experience at Toyota Kirloskar Motor. Skilled in React, Node.js, MongoDB, TypeScript, and Docker. Strong foundation in DSA.

Education

ACS College of Engineering (VTU) Bachelor of Engineering in Computer Science and Engineering CGPA: 8.5	Bangalore, India 2027
St. Joseph's Indian Composite PU College PCMC (Class 12) Percentage: 88%	Bangalore, India 2023
Shantiniketan Educational Institutions ICSE (Class 10) Percentage: 92%	Bangalore, India 2021

Experience

Software Development Intern - Toyota Kirloskar Motor Pvt. Ltd.	Mar 2026 - May 2026
- Contributed to a full-stack Production Management & Sign-off Portal, building responsive UI components and dashboard views using React and Tailwind CSS, enabling manufacturing staff to track production, and backlog data in real time. - Integrated frontend views with JWT-authenticated REST APIs built on Node.js and Express.js, and used Socket.io to push live production updates to dashboards without manual page refreshes. - Assisted in implementing digital approval (sign-off) workflows backed by a MySQL database, reducing paperwork and improving traceability of production records for manufacturing user roles.	

Projects

ML Drift Lens - Real-Time ML Monitoring & Automated Retraining	Aug 2026
- Built a full-stack platform monitoring a network intrusion detection model which tracks live predictions, detects data drift, and triggers automated retraining, with a standalone Spring Boot microservice consuming drift events in real time to generate alerts. - Developed a real-time React dashboard visualizing live drift scores, alerts, and model version history. - Containerized all services with Docker Compose, built a GitHub Actions CI/CD pipeline for automated testing and deployment, and deployed the full system to Railway. Tech Stack: React, TypeScript, Node.js, Express.js, PostgreSQL, JWT, Python, FastAPI, Java, Spring Boot, Docker	
Collabryx - Collaborative Coding Platform	Feb 2026
- Built a real-time collaborative coding workspace enabling simultaneous multi-user editing, with isolated code execution enforcing resource limits and execution timeouts for secure program execution. - Designed MongoDB-based workspace persistence and snapshot versioning, allowing users to save and restore coding sessions across visits. Tech Stack: React, Tailwind CSS, Node.js, Express.js, Socket.IO, MongoDB, Docker	

Technical Skills

Languages: Java, Python, C++, JavaScript, TypeScript
Frameworks & Libraries: React, Tailwind CSS, Node.js, Express, FAST API, Spring Boot, Socket.IO, HTML, CSS
Databases: MongoDB, MySQL, PostgreSQL
DevOps: Docker, Jenkins, Linux
Core CS: Data Structures & Algorithms, OOP, Operating System, DBMS, Computer Networks, System Design
Tools: Git, GitHub, Postman

Certifications

Oracle Cloud Infrastructure 2025 - Certified DevOps Professional	Sep 2025
NPTEL - Introduction to Machine Learning	Oct 2025
Udemy - Web Development	Nov 2024

Achievements

- International Tech Bootcamp 2026** - USIM Malaysia
- CODE NEURAL State-Level Hackathon** - **Top 10 Finalist**
- Freelanced as a web developer**, building and deploying responsive websites for small businesses
